

Dear Community Member,

We understand that there is a lot of concern in our local community as news of the spread of Coronavirus (COVID-19) continues to develop. St. Rose Hospital is continuing to monitor and respond to this evolving situation and is committed to keeping our community safe.

What we are doing to keep you safe

- | For your safety and to minimize the potential of virus exposure for our patients and staff, we are screening all patients via phone, prior to your outpatient procedure(s).
- | If you need emergency care, you will be screened prior to entering the Emergency Department.
- | If you have respiratory symptoms, you will be given a mask to wear.
- | If you have respiratory symptoms and meet the screening criteria for COVID-19, your Emergency Department clinician will determine the appropriate clinical course.

How St. Rose Hospital is prepared to care for patients with COVID-19

We have detailed plans in place for our medical facility and we manage the care of infectious or potentially infectious patients every day. Your care and safety continues to be our top priority.
